CASEBOOK DOCKING SLEEVE
Fully Integrated into glove-box
(Vauxhall Astra / GM)

CASEBOOK DOCKING SLEEVE
Secure Locking Mechanism

CASEBOOK

COMPLETE DOCKING OPTION

About the Docking Solution

The docking station automatically connects the CASEBOOK computer to a high resolution touch-screen sunk into the vehicle dashboard. Driver and passenger can view the screen (where permitted) to access and enter information using a secondary 'floating' keyboard.

The highly compact nature of the docking station means it can be easily located in the optimal location for each type of fleet vehicle – (i.e. saloon, estate, specialist or commercial.)

The docking station can also be used with just a single connection to vehicle power. This is ideal for front line workers who do not require secondary in-dash touch screens, keyboards or external antennae. The simple VESA mount design vastly reduces fitting costs.

- Lightweight, strong & compact docking sleeve
- Tablet constantly charged and ready to go
- Tablet computer is firmly restrained in case of collisions
- Secure 'Kensington' key locking prevents unauthorised removal
- Computer can be quickly and easily 'undocked' – allowing the CASEBOOK to be used away from the vehicle, fully charged

How it works

- One Point Vehicle Dock secures the CASEBOOK & automatically connects it to in-vehicle technology, including device charging
- Re-routes 3G and WiFi signals to external vehicle antenna
- Syncs to dashboard mounted touchscreen

OPEN FRONT DOCKING OPTION

About the Docking Solution

The docking station securely holds the CASEBOOK computer, allowing it to be used in either tablet or laptop mode. This allows both driver and passenger to view the screen (where permitted) and access and enter information using a secondary 'floating' keyboard.

The highly compact nature of the docking station means it can be easily located on the dashboard in the optimal location for each type of fleet vehicle – (i.e. saloon, estate, specialist or commercial.)

The docking station can be used with just a single connection to vehicle power. This is ideal for front line workers who require their device to be fully charged at all times. The modular mounting system of the dock allows it to be mounted straight onto the dash, or via suction cups to the windscreen.

- Versatile mounting options available
- Tablet constantly charged and ready to go
- Tablet computer is firmly restrained
- Device is always accessible and visible
- Computer can be quickly and easily 'undocked' – allowing the CASEBOOK to be used away from the vehicle, fully charged

How it works

- One Point Vehicle Dock secures the CASEBOOK & automatically connects it to in-vehicle technology, including device charging
- Re-routes 3G and Wi-Fi signals to external vehicle antenna
- Device can be easily removed via sprung loaded connector

CASEBOOK

OPEN FRONT DOCKING OPTION

CASEBOOK

LOW COST DOCKING HOLSTER

- QUICK & EASY FIT ANYWHERE IN VEHICLE
- STRENGTHENED HEAVY DUTY FABRIC
- PROTECTS TABLET FROM ACCIDENTAL KICKS
- DESIGNED TO WORK WITH CIGAR LIGHTER 12V CHARGING LEAD
- VEHICLE SAFETY - RESTRAINS DEVICE IN CASE OF COLLISIONS
- SECURITY - COVERS UP DEVICE FROM PRYING EYES
- AFFORDABLE - EXTREMELY COST EFFECTIVE
- TOTALLY FLEXIBLE - EASILY TRANSFERRED FROM VEHICLE TO VEHICLE
- NO DAMAGE FIT - ENHANCES RESALE VALUE OF VEHICLE FLEET

CASEBOOK

LOW COST DOCKING HOLSTER

-  DIRT PROOF AND WATER RESISTANT
-  PROTECTS FROM KNOCKS AND BANGS
-  EASILY TRANSFERRABLE
-  CHARGING WHILST DOCKED
-  RAPID FIT AND REMOVAL TIME
-  TOTAL CHOICE OF FITTING LOCATIONS
-  SECURE COVER FROM PRYING EYES
